No. B/17574 of 1911.

Office of the Surgeon-General with the Government of Bombay:
Poona, 21st September 1911.

From

The SURGEON-GENERAL with the GOVERNMENT of BOMBAY;

To

The SECRETARY to GOVERNMENT,
General Department, Bombay.

Sir,

I have the honour to submit for the information of Government the Triennial Report of the Civil Hospitals and Dispensaries of the Bombay Presidency for the years 1908—1910.

Statement A.—Hospitals and Dispensaries.

2. The total number of these institutions now reported on has fallen from 704 in 1907 to 698 on 31st December 1910. The decrease is due to the fact that reports have not been received from a certain number of private Dispensaries which may however still be in existence. The State Aided, Government and Railway institutions have increased from 379 in 1907 to 397 in 1910.

A scheme for the provision of additional dispensaries in districts where they are required is now before Government; and Government has approved of a new design for these buildings which will enable local bodies and charitable persons to make a start with a small dispensary, capable of being added to on a regular plan as funds may be available.

During the past three years the following institutions have been completed and taken into use:—

(1) At Karáchi, a new Civil Hospital of 162 beds.

(2) At Poona, the Jacob Sassoon Hospital, for Europeans and Jews, of 49 beds, and a Septic Maternity of 8 beds.

(3) At Belgaum, a new Civil Hospital of 104 beds.

(4) At Lárkhána, a new Civil Hospital of 30 beds.

(5) In addition to these 13 new Grant-in-aid Dispensaries and 6 non-aided Municipal and Local Fund Dispensaries have been opened.

Funds have been collected in East Khándesh for a Civil Hospital at Jalgaon; and plans for a new Civil Hospital at Sholápur are under preparation.

Additions and improvements have been made to the following institutions:—

To the J. J. Hospital, the Sir William Moore Operating Theatre has been added. The Cama and Albless Hospitals have received additional Wards, Mortuaries, etc. The Goculdas Tejpal Hospital, a new Out-patient Department and new Mortuaries. The Cowasji Jehangier Ophthalmic Hospital, additional Wards. Ahmedabad Civil Hospital, a Nurse's Home. Hyderabad Civil Hospital, new Operation Theatre, Out-patient Department, and Maternity. Sukkur Civil Hospital, Bijápur Civil Hospital, and Ahmednagar Civil Hospital have each received a new operation room. Kárwár Civil Hospital, additional Women's wards. Dhárwár Civil Hospital, additional wards for Europeans. Násik Civil Hospital has been increased by Government having taken over the Bai Dankorbai Hospital

adjacent to it, as Wards for Women and Children. These will be taken into use as soon as certain necessary repairs and alterations have been effected.

In addition to these a large number of minor additions and alterations have been carried out at various hospitals to remedy defects, or improve the utility, of the institutions.

Statement B.

3. The number of patients treated has steadily increased from 2,183,819 in 1907 to 2,261,685 in 1910.

The in-door patients treated in 1910 numbered 54,612 as compared with 50,400 in 1907. Of these 35,713 were reported "cured" and 5,074 died as against 30,175 cures and 5,114 deaths in 1907.

The percentage of mortality for the triennium under report was 9·6. This contrasts favourably with 10·9 the figure for the previous three years.

The number of beds available has risen from 5,427 in 1907 to 5,888 in 1910 and the average number occupying them from 2,770·5 to 2,855·5.

The increase in the number of patients treated has not been confined to any one class of institution but has occurred both in General Hospitals and those reserved for women and children.

Statements C (I) and (II).

4. It may be noted that the form on which this statement has been furnished has undergone considerable modification from that formerly used. The headings of diseases have been re-grouped, and under each is given the number treated and the mortality due to it. These alterations will give a ready means of comparison in future. In-door and out-door patients are now shown on separate forms.

Of the more important diseases, *small-pox* caused 3,879 admissions during the triennium against 3,428 in the previous period. During the year 1910 out of a total of 1,847 cases 816 were treated in Bombay City alone. It is evident that the numbers treated at the hospitals and dispensaries form only a very small fraction of the cases which actually occur. The more general introduction of compulsory vaccination is much to be desired. The mortality from this disease is only a portion of the damage done by it. Numerous cases of total blindness result from it and many recover from the actual attack itself only to die, after much suffering from one of its many *Sequelæ*.

Cholera.—Against 4,582 cases treated in 1905—07 the past three years have yielded 3,244 only and of these 2,347 occurred in 1909 when the disease was epidemic in parts of the Deccan, having arisen in connection with the large fair at Násik. This disease is coming much more under control than formerly and the people are learning to appreciate the use of Permanganate of Potash in their wells and the advantages of protecting their water-supply.

Dysentery and Diarrhœa furnish as usual a large number of cases. During the period under report 257,481 cases were treated as compared with 253,006 in the preceding three years. The diagnosis in many cases returned as "Dysentery" is not as yet satisfactory. A Commission on Dysentery has conducted an exhaustive enquiry into the ætiology of the disease. The results have not yet been published.

Malaria.—The total of cases treated in 1905—07 was 1,254,181 and in 1908—10 increased to 1,270,121. The disease was very prevalent in 1908. During 1910 although malaria was not reported as being especially prevalent a larger number of cases was treated than in any year since 1906. The returns for 1910 are swollen by the inclusion of the cases treated by the Medical Officers sent out into selected districts after the rains. They treated

28,633 cases and it seems probable that most or all of these would have remained untreated but for them. Their work has been already separately reported on.

Malaria has as usual been most prevalent in Sind and the Konkan. The special enquiry conducted by Dr. Bentley in Bombay City was almost finished at the end of the year and his report has since been submitted to Government. It is a most complete and valuable one and contains recommendations for the control of malaria in Bombay which, if properly carried out, should eventually free the City from endemic malaria and make epidemic impossible. Work is now being carried out by the Sanitary Department with the object of making a malarial census of the Presidency. When it is more accurately known which are the real endemic centres of malaria, work for its prevention may be concentrated upon them and better results looked for. In the meantime the regular and general administration of quinine to all cases of malaria, together with such measures as it is possible to take locally for the prevention of anopheles breeding, seems to offer most hope for getting the disease under control. Of much importance also is the education of the people in the cause of malaria, and the knowledge of how to protect themselves against it.

Leprosy.—The admissions for leprosy show no increase and it seems probable that the number of lepers in this Presidency is actually decreasing. Captain Beauchamp Williams has worked at Mátunga Leper Asylum throughout the year. His results are promising, and give hope that it may be possible to prepare a really effective vaccine for the treatment of this disease. He has since furnished a separate and very interesting report on his work.

The admissions for diseases which are largely preventable, such as *Venereal diseases, Diseases of the Eye,* and *Intestinal Worms* remain about the same as during the former three years. Education in elementary sanitary laws must spread among the people before much decrease in these can be looked for.

Tuberculosis.—For the first time tubercular disease of the lungs is shown under a separate heading; 6,295 cases were treated during the year 1910.

The total number of cases due to tuberculosis treated in the years 1905—07 was 15,743. For 1908—10 it rose to 29,831, an increase of 14,088 cases. A certain amount of this increase must be put down to more accurate diagnosis, but allowing for this, it would appear that the disease is on the increase at any rate in the large towns, and that it is necessary that some special measures should be taken to deal with it.

Local injuries show a steady increase from 102,219 cases in 1905 to 122,080 in 1910. This increase is such as might be looked for in consequence of the industrial growth of the country, and the introduction of mechanical appliances of all sorts.

Snake bite.—During 1910 the number of cases reported was 73 of which 10 proved fatal. In all of these cases Permanganate of Potassium was used but no case was reported in which a cure could be attributed to its use. Government has sanctioned funds for the preparation of an antiserum for use in cases of Phoorsa bite (Echis Carinata).

Serum therapy.—The treatment of different forms of disease by means of sera and vaccines has been continued and extended during the year 1910 and a number of cases are reported in which this form of treatment has been attended by the greatest benefit to patients. The sum of Rs. 1,500 placed at my disposal to defray the cost of this work has been all expended.

Several cases of the use of Salvarsan or "606" are reported and the results are satisfactory, but the number is too few to form any positive opinion as to its value for general use.

The following table shows the number of admissions for the principal diseases during the past three years :—

Disease.	1908.	1909.	1910.
Small-pox	1,194	838	1,847
Cholera	288	2,347	609
Dysentery	35,997	35,241	40,364
Malarial Fever	422,570	417,204	430,347
Venereal Diseases	44,274	45,278	37,273
Diseases of the Eye	230,705	236,282	131,409
„ Ear	97,571	107,655	106,610
„ Respiratory-system	123,049	132,799	138,876
Tubercle of lung	Not shown separately.		6,295
Diarrhœa	45,616	48,253	52,010
Rheumatic Fever and Rheumatism	53,284	54,496	49,809
Diseases of the Nervous system	57,156	44,511	44,336
Injuries	116,980	121,739	122,080

Statements D, I and II, and E.—Attendance at State—Special, Railway and Private Non-aided Hospitals and Dispensaries.

5. The attendance at Police, Canal, Forest, and other State special institutions rose from 29,734 in 1907 to 46,496 in 1910.

At Railway Hospitals the attendance fell from 174,387 in 1907 to 173,690 in 1910.

The number reported as having been treated in Private non-aided institutions in 1910 was 1,790,999 as compared with 1,861,447 in 1907, but as noted above reports have not been received from some of these institutions which furnished them in 1907.

Statement G.—Surgical Operations.

During the year 1910 there were performed 90,123 operations upon 89,504 persons with a mortality of 0·46 per cent. among all patients admitted and remaining in hospital from 1909.

In 1907 the operations numbered 82,123 on 80,933 persons with a mortality of 0·52 amongst all patients admitted during that year and remaining from 1906.

Owing to changes which have taken place in the nomenclature of operations, and consequent transfer of some operations from groups in which they were formerly included, no comparison between the work of 1910 and that of former years can be made in respect of certain of them.

The surgical work done in the hospitals of the Presidency has been of a high order and the results are good. Much has been done to improve the surgical equipment of the hospitals. The results obtained might certainly be made still better and the work easier, if the hospital ward servants, to whom much detail must necessarily be left in a large Civil Hospital where sufficient trained nurses are not available, were of a better class and capable of being trained in the minor technique of aseptic surgical work. The days are past when any cooly who could clean a window and bring a "lota" of water to a patient was considered good enough to be a ward servant.

The ward servants in many of the hospitals are deficient in both quality and numbers.

With regard to the more important operations the following comparisons may be made between the work done in 1907 and 1910. In 1907 there were removed 1,313 tumours and cysts with a mortality of 11 while in 1910 such operations numbered 1,248 with 3 deaths. Amputations amounted to 732 in 1907 with a mortality of 48 and in 1910 they numbered 642 with 37 deaths. The decrease in the numbers of these operations is steady. In the year 1905 they reached 820. This improvement is due to the wider and more perfect use of antiseptic methods. Many limbs are now saved when formerly amputation was the only resource. Operations on the eye in 1907 numbered 4,490 of which 1,126 were for extraction of the lens for cataract. In 1910 they were 3,726 but the extractions of the lens rose to 1,650. The public is yearly recognizing more the value of this operation and resorting less to the travelling quack who "couches" or dislocates the lens with temporary improvement of vision ending in permanent blindness.

Abdominal operations in 1907 were 1,081 including 98 for radical cure of hernia and 142 for abscess of the liver with a total mortality of 147.

In 1910 the number was 1,232 including 123 for radical cure of hernia and 155 for abscess of the liver while the total mortality was 163 of which no fewer than 59 were cases of abscess of the liver.

Stone in the Bladder.—Operations for the relief of this condition were 1,401 in 1907, of which 1,209 were litholapaxies, with a death-rate of 2·64 per cent. In 1910 there were 1,128 operations with 1,027 litholapaxies and the death-rate for these was 2·24 per cent.

Operations for diseases and conditions peculiar to women totalled 847 with 14 deaths in 1910 as compared with 567 with 19 deaths in 1907. Obstetric operations amounted to 834 with 28 deaths in 1910 as compared with 491 and 25 deaths in 1907.

Statement H.—Income and Expenditure.

8. The total income, exclusive of the cash balance, amounted to Rs. 19,97,358 as compared with Rs. 16,87,612 in 1907, showing an increase of Rs. 3,09,746 over the preceding triennium. The amount received from Government was Rs. 11,27,852 as compared with Rs. 9,34,727 in 1907. Local funds contributed Rs. 2,29,595 as compared with Rs. 2,38,642 in 1907 and Municipal funds Rs. 4,14,192 as compared with Rs. 3,16,784 in 1907. The interest on investments yielded Rs. 36,455 subscriptions from Europeans and Indians amounted to Rs. 40,635 as compared with Rs. 39,783 in 1907. Miscellaneous receipts amounted to Rs. 1,48,629 of which Rs. 82,510 were realised on account of hospital fees from paying patients.

The total expenditure incurred during the year under report was Rs. 19,90,212 against Rs. 16,65,928 spent in 1907. The nursing establishment cost Rs. 1,36,891 or Rs. 26,385 more than in the year 1907. The charges on account of medicines amounted to Rs. 2,31,721. Rs. 2,40,876 were expended on diets, and Rs. 2,39,755 were spent on buildings or repairs. Deducting from the total expenditure the sums remitted into the treasury on account of hospital fees, sale-proceeds of unserviceable articles, etc., and invested during the year, the net cost was Rs. 18,37,319. The average cost of each diet was Re. 0-3-2. The percentage of cost borne by Government was 53·9 against 54·4 in 1907.

Statement J.—Invested Capital.

9. On 1st January 1910 the invested capital stood at Rs. 9,34,900.

During the year under report Rs. 35,070 were invested and securities worth Rs. 2,300 were sold and withdrawn, leaving a balance of Rs. 9,67,670 at the end of the year.

General Remarks.

10. *Medical Schools.*—At the close of the year there were 317 students attending the three Provincial Schools, distributed as shown in the annexed statement.

The school buildings at Poona and Hyderabad (Sind) are now satisfactory, but those at Ahmedabad are sadly in need of reconstruction. New lecture rooms and new Chemical and Physiological Laboratories are very badly required at this school and tuition now is carried on under much difficulty and is much less practical than it ought to be.

The teaching staffs of all the schools are deficient in numbers. A scheme for their increase has been approved by Government and this much needed improvement will be carried out this year.

Equipment of Hospitals.—A sum of Rs. 1,93,987 was spent on the equipment of Civil Hospitals during the triennium with very satisfactory results. The great need of most Hospitals now is that of better trained servants to whom the handling and cleaning of delicate and expensive appliances can be safely entrusted. The general equipment of nearly all the Civil Hospitals, including bedding and clothing, may be considered satisfactory, but in some cases the allowance for renewals is not yet large enough.

Nursing Establishments.—Nursing Associations have been started at Mátherán, Belgaum and Dhárwár during the triennium and all are now working.

The Associations formerly existing are all developing and gradually becoming more valuable and efficient, especially in the larger cities. A large debt of gratitude is due to those gentlemen who give up so much of their time to the collection of Funds, and the management of these Associations.

The Bombay Presidency Nursing Association has been established during the past year and has commenced work.

At Ahmedabad and Belgaum schemes are on foot for the training of Indian women as midwives. The former especially promises to develope into a large and important school.

Consulting staffs at the Bombay Hospitals.—With a view to add to the efficiency of the Bombay Hospitals, Government has been pleased to nominate a consulting staff for each, the members of which may be called upon for assistance in difficult cases by the officers of the Hospitals, and may be called in consultation at the desire of patients.

The work and progress made during the triennium has been quite satisfactory. With a few exceptions the Hospitals are convenient and commodious buildings and are well equipped. In its Civil Medical Service Government possesses a hard-working and reliable body of servants among whom there is a high sense of duty, and they have well maintained their reputation for good work during the period under report.

Donations.

11. The following contributions have been received from private donors during the year under report :—

(1) The Honourable Khán Bahádur Nowroji Pestonji Vakil, C.I.E., contributed Rs. 40,000 for the provision of a general ward and maternity hospital for Pársis and Europeans at the Huttesing and Premabhai Civil Hospital, Ahmedabad.

(2) Mr. M. S. Vakharia has offered a donation of Rs. 6,736 for the construction of a separate ward for Pársis at the Civil Hospital, Broach.

(3) Bai Jarbai Nowroji Wadia, of Bombay, offered Rs. 10,000 for the construction of a new building for the Dispensary at Málegaon in the Násik District.

(4) Sardár Bomanji Ardeshir Dalal has offered to construct a charitable dispensary at Rustampura in the Hálol Mahál of the Panch Maháls District in memory of his deceased father and to endow it with Rs. 500 per annum.

(5) Messrs. Rukre and Kale contributed Rs. 6,000 for the construction of a building for the newly opened dispensary at Ghoda in the Poona District.

(6) Mr. Ganpatlal Parashram Agarwale offered a contribution of Rs. 500 towards the construction of a female ward for the dispensary at Shirpur in the West Khándesh District.

I have the honour to be,

Sir,

Your most obedient servant,

H. W. STEVENSON,

Surgeon-General, I. M. S.,

Surgeon-General with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT A.

Showing the number of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1910.

[Total Population of the Province—27,074,570.]

Class of Civil Hospital and Dispensary.	Number open on 31st December 1909.	Number opened during the year 1910.	Number closed during the year 1910.	Number open on the last day of the year 1910.	Remarks
1	2	3	4	5	6
I.—State—Public ...	49	...	...	49	
II.—State—Special—					
(i) Police ...	5	...	...	5	
(ii) Forests and Surveys ...	2	...	...	2	
(iii) Canals ...	3	...	...	3	
(iv) Others ...	13	(*a*) 1	...	14	(*a*) Agricultural College Dispensary, Poona.
III.—Local and Municipal Funds ...	265	(*b*) 3	...	268	(*b*) Infectious Diseases Hospital, Poona, and Ghoda Dispensary (Poona) and Jamesabad Dispensary (Thar and Párkar).
IV.—Private—Aided ...	10	...	...	10	
V.—Private—Non-aided ...	330	(*c*) 2	(*d*) 31	301	(*c*) 1 in Sholápur District and 1 in Káira Agency. (*d*) 15 in Káthiáwár Agency, 3 in Thána District, 2 each in Bombay City and Surat and Rewa-Kántha Agencies, and 1 each in Poona, Násik, Káira and Ahmedabad Districts and Poona, Sátára and Baroda Agencies.
VI.—Railways ...	46	...	...	46	
Total ...	723	6	31	698	

CLASSES I AND II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as 'State', when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—'Public' are State Dispensaries which are open to the poorer classes of the public. Class II are State dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution is aided by private subscriptions, or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries, whether maintained by State railways or others.
